

DISPOSABLE CUTTERS OF PACKING TAPES AND FILMS SAFETY KNIVES

Blunt tip for safer cutting of packing tapes compared to using a knife or sharp blade.

◀ One-shot knife – BN T1

Knife – **Type: 4513**

- Efficient tool with a long life. Hard ergonomic handle designed to bring maximum comfort. Wrist is in a neutral position.
- Economic, easy to use.
- Cuts most wrapping tapes.

One-shot knife ▶

Knife – **Type: 4514**

Innovative properties:

- Very well visible ergonomic handle from hard plastic.
- You can start cutting from the middle, from the top or bottom of a pallet wrapped in a contraction foil.
- Safe cutter of a wrapping tape.
- Very sharp, long-life blade.
- Disposable and economical.

Safety knife RZ3 ▶

Knife – **Type: 4509**

Spare blades, package 100 pcs – **Type: 4510**

- Ergonomic holder – fit for opening cardboard boxes.
- Cutting possible with both right and left hand.
- Three cutting buttons (top + right + left).
- The blade goes in automatically.

Correct technique of cutting

- 1/ Move the button forward to push the blade out. Put the other hand away from intended cut path.
- 2/ Push the blade strongly in the cut surface and start cutting.

3/ Stop pushing the button using your thumb, move it to the knife handle and go on cutting. Box friction force will keep the knife out. After finishing the cut the blade will slide back automatically.

Wheel for blade fast replacement.

Blade safe end reduces a risk of injury caused by stabbing.

Blade replacement.
