

# MUD COLLECTORS, ROAD BARRIER

## Mud collectors

- Suitable for trapping of coarse impurities in street inlets and channels.
- The bin is welded from steel metal sheets with ground paint or zinc-coated.
- Correspond to Czech standards as far as dimensions are concerned.
- Upper and bottom hook eases operation.

TYPE	NAME	SURFACE FINISH	MAIN DIMENSIONS (mm)
1081 / 1082	Mud collectors 50 l	varnished / hot-dip galvanized	380 x 256 x 700
1084 / 1085	Mud collectors 35 l	varnished / hot-dip galvanized	380 x 256 x 500
1087 / 1088	Mud collectors 10 l	varnished / hot-dip galvanized	255 x 190 x 425

## Road barrier

- Road barriers serve for fast and easy marking of changes and diversions not only in traffic.
- Connecting elements enable easy connection of individual elements in one line. In case of need the barriers can be weighted down (with water or sand), which increases their stability.
- Profiled bottom ensures stability both of individual barriers and all the line.
- Road barrier is a product not containing movable parts. If you put together several barriers, you will get firm and solid structure ensuring resistance to vehicle impacts in any weather. Possibility of construction of a row of barriers enables optimum adaptation to space conditions.
- Colour finish – barriers are standardly available in white and red colour.
- High service life – thanks to sturdy and solid structure, quality polyethylene and modern production technology ensure their high resistance to mechanical damage and weather effects (thanks to UV-stabilisation they are characterized with their high colour retention even under long-lasting effects of solar radiation). They are light and do not rust, do not contain any metal parts. Other parts can be connected thanks to connecting elements. Original structure and modern design, well visible for drivers.

TYPE	COLOUR	WIDTH (m)	DEPTH (m)	HEIGHT (m)	WEIGHT (kg)
3342	red	1.01	0.40	0.81	8
3343	white	1.01	0.40	0.81	8
