

COMPOST BINS AND SILOS

Thick-walled compost bins

- Unique wall thickness of composter bins 8–10 mm ensures not only high thermal insulation, but also their above-average stability and lifespan of compost bins – 20 years.
- Sufficient number of side air holes provides optimal air and humidity circulation. Ventilation system prevents clogging of air holes.
- Top lid equipped with hinges for compost bin easy filling. Compost can be taken out from all sides.
- Made from recycled HDPE, resistant to UV radiation. Certified with international quality certificate NF Environment.

Type: 7169

31 kg Ø 1,360 x 1,200 mm 1,170 l

Type: 7170

36 kg Ø 1,760 x 1,090 mm 1,830 l

Package dimensions:
1,000/1,200 x 210 x 140 mm

Wooden compost bin

- Made of unplanned wood, waterproofed by soaking in an agent called ADOLIT. It is delivered dismantled. Very simple assembly without using tools. Delivered in two sizes.

Type: 3705

19 kg
1,000 x 1,000 x 700 mm
600 l

Type: 3706

22 kg
1,200 x 1,200 x 700 mm
850 l

Easy assembly without tools.

Silo

- The advantage of this new product is its bigger capacity compared to closed compost bin. We deliver the product dismantled in a carton. It is very easy to assemble it right at the place where you want to have it.
