

- ◀ - Suitable for collection, handling and sorting of industrial waste.
- Resistance to mechanical wear is increased thanks to pressed bulges.
- There is a covered outlet in the bottom for easy cleaning of the inner space of the container.
- Upon agreement, containers can be fitted with a central brake, lid lock, foot opening, ridge bar, oil-tight design, adjustment for handling by the forklift truck, drawbar and hinge, various container reinforcements and also with a protective frame.
