

VARNISHED METAL BARRELS

Metal barrels with plugs ▶

- The barrels are made of steel metal sheet. The shell is welded and reinforced by pressed stiffeners. Bottom and lid of the barrel is connected with the shell by multiple safety clamping. To ensure leak-proof design, a sealing paste is coated on the clamping. The leakage-proof is tested for every barrel.
- The filling hole of the barrel is closed with a plug which can be locked with a protective lid with a tear tape. This provides an originality of filling.
- The structure enables multi-use, retrofitting, recycling.
- The barrel is suitable for transport and storage of all types of liquids in the sense of specified transporting regulations mentioned hereinafter.
- Approved marking:
The barrels are approved for transportation according to the international regulations:

Plug detail.

Barrel openers and keys

◀◀ Plastic opener Type: 3247

- Made from solid plastic.
- Solid design.
- Allows the opening of 3/4", 2" plugs and removable lid.

◀ Key for plug Type: 0735

- Galvanized surface finish.
- Allows the opening of 3/4" and 2" plugs.

Barrel opener Type: 8609 ▶

- Suitable for cutting off the rimmed metal barrel lid.
- Adjustable according to the rim width.

📏 The lever length 500 mm 📦 2.7 kg

Spare blade Type: 8609-A
